

# Analysis of FIFA 18 Player Ratings

By Big Baller Data

Ammar Banatwala, Austyn Yamada, Donald Vu

# Guiding Questions

---

- 1) Identifying which variables correlate highly with a players Overall rating. This would let us see which traits and attributes are seemingly more important in determining how good a player is.
- 2) Identifying which teams are getting more bang for their buck by analyzing the wages they pay their players and the their average Overall player rating.
- 3) Identify which predictors are significant for predicting wage.

# Correlation Table for Overall Rating

- Only 5 predictors have a correlation above .45 with Overall:
  - Special (.604461)
  - Composure (.633664)
  - Short Passing (.491155)
  - Vision (.485516)
  - Reaction (.840602)

	Overall	Special	Composure	Reactions	Short Passing	Vision
Overall	1	0.604461	0.633664	0.840602	0.491155	0.485516
Special	0.604461	1	0.808071	0.590272	0.906123	0.756246
Composure	0.633664	0.808071	1	0.602478	0.763045	0.647695
Reactions	0.840602	0.590272	0.602478	1	0.468983	0.48559
Short Passing	0.491155	0.906123	0.763045	0.468983	1	0.718995
Vision	0.485516	0.756246	0.647695	0.48559	0.718995	1

# Comparing Average Wages and Overall

Club	Average Wage
FC Barcelona	\$208,454
Real Madrid CF	\$147848
Juventus	\$126600
Manchester City	\$110000
Manchester United	\$104000

Club	Average Overall
FC Barcelona	83.45
Juventus	82.04
Napoli	78.60
Inter	77.56
Real Madrid CF	77.27

- Looks like FC Barcelona, Juventus, and Real Madrid CF are doing well for themselves. They are 3 out of the 5 top wage teams that are getting their money's worth since they also made the top 5 average Overall rating. Both Manchester teams need to rethink their roster and be more careful with handing out large contracts

# Feature Selection

---

## Using ExtraTreesClassifier

Positioning	0.033641
Stamina	0.033331
Ball Control	0.033052
Short Passing	0.031888
Heading Accuracy	0.031472

## Using Univariate Selection

Long Passing	22765.916405
Crossing	20883.949138
Vision	19601.057020
Dribbling	17815.322511
Penalties	17814.677316

# Comparing Model Criterion

ExtraTreesClassifier:

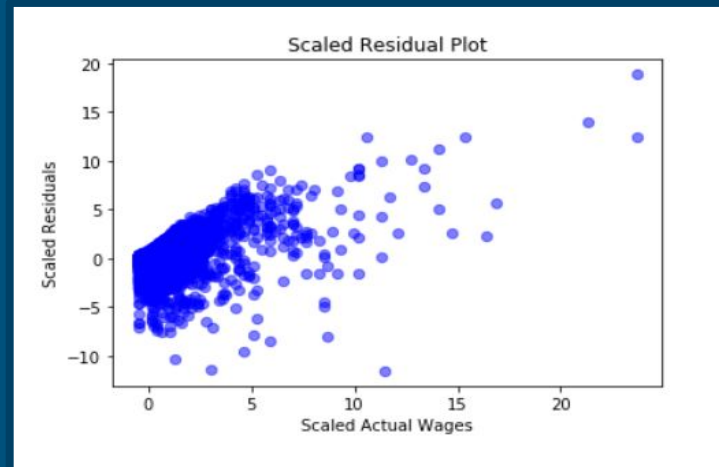

MSE	4.923719e+08
SSR	8.862695e+12
SST	9.839082e+12
SD	2.218946e+04
R-Squared	.262
Adj. R-squared	.261

Univariate Model Summary:

MSE	4.532284e+08
SSR	8.158112e+12
SST	9.839082e+12
SD	2.128916e+04
R-Squared	.264
Adj. R-squared	.264

# Linear Model Chosen

Features	Est. Coefficients
Long Passing	50.8528
Crossing	48.2577
Vision	104.7024
Dribbling	-44.6983
Penalties	-82.3430
Composure	246.2441

THANK YOU
